

2019 GMRI Summer Intern Research Symposium

August 7th, 2019

GMRI Boardroom

- 12:00 Allison Kreiley – Understanding *Calanus finmarchicus* abundance in response to oceanic stratification
- 12:15 Graham Bendickson - A temporal and spatial analysis of ichthyoplankton communities in Maine coastal and estuarine ecosystems
- 12:30 Keyana Pardilla – Interannual differences in alewife (*Alosa pseudoharengus*) energy density
- 12:45 Kasey Kelly – Observing predator avoidance behavior in juvenile lobsters (*Homarus americanus*)
- 1:00 Keith Keel – An assessment of fish and crustacean populations in southern Casco Bay eelgrass beds
- 1:15 Liam Kehoe – Striped bass (*Morone saxatilis*) distribution and origin in coastal Maine waters
- 1:30 Kyle Oliveira – Analyzing impacts of temperature changes in the northwest Atlantic on movement patterns of Atlantic bluefin tuna (*Thunnus thynnus*)
- 1:45 Isabelle See – Evaluating the foraging ecology of Atlantic bluefin tuna (*Thunnus thynnus*) in the Gulf of Maine
- 2:00 James Calhoon – Foraging ecology of yellowfin and bigeye tuna in the northwest Atlantic
